HEALTH INSURANCE MARKETPLACE RESOURCES

MHA is the country's leading nonprofit dedicated to helping all people live mentally healthier

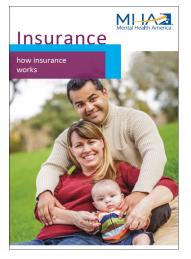

lives. In all of our work, we focus on: prevention for all; early identification and intervention for those at risk; integrated health and behavioral health care for those who need it; and recovery as a goal. Through our public education efforts MHA works to promote wellness across communities and in families, reaching millions of people across the country each year.

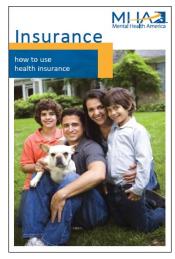

As part of a Federal Navigator grant funded through the Centers for Medicare and Medicaid Services, we developed a variety of printed materials that can help you and your community in understanding health insurance and the options that are available through the Federal Health Insurance Marketplace, healthcare.gov. These materials are currently available at no-cost and in a

variety of languages.
